

WindSculpt instructions. Use the video also to install located at <https://windsculpt.com/>.

Some modifications have been made to the video see below :"

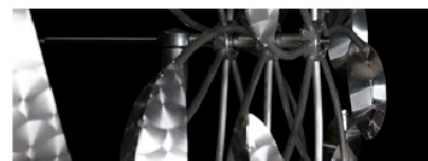

There is also a Bearing Set that is to be installed at the top of the pole & the bracket

Very Important that the Small cups are closest to the Pole , then the large cups , then the medium cups.

Very Important that the **Small cups** are closest to the Pole , then the large cups , then the medium cups are farthest away from the pole. **ALSO THE Medium & Small CUPS** Be installed so the wind turns them ClockWise. This will prevent the Nut from coming off.
